

MALARIA FREE SAFARIS

We can arrange malaria free safaris in several areas of South Africa:

Kwandwe Game Reserve – In the heart of the Eastern Cape, the 54,000 acre Kwandwe reserve houses four separate lodges. Home to some intriguing habitats the wilderness here hosts, among others, lion, rhino, buffalo, elephant and cheetah.

Madikwe Game Reserve – running along the border with Botswana this pristine piece of wilderness is home to the Big 5 and plenty of other wildlife species. A handful of excellent lodges provide accommodation styles to suit all.

Tsalu Kalahari – At over 1,000 square kilometres, Tsalu Kalahari is the largest privately owned reserve in South Africa. It's an extraordinarily beautiful spot and home to good variety of wildlife including habituated meerkats and majestic black-maned Kalahari lion

The Waterberg – Several private reserves here offer a great choice of places to stay with some excellent lodges, camps and family-run farms making the experience truly unforgettable. Game drives, riding and walking safaris are all available here.
